

专业导师 0.8-1 文书修改标准

1. 确保专业表述严谨到位
2. 锤炼完善全文细节
3. 升华实践/学术/科研思考
4. 补充完善 Why School 细节
5. 把关深化 Career Goal
6. 确保全文精彩流畅，思考深入

合格 0.8-1 文书修改范例

项目名称: LL.M. University of Southern California

项目链接: <http://gould.usc.edu/academics/degrees/llm/>

计划就读时间: 2018 Fall

具体文书要求: A ~~two-~~ to ~~three-~~page statement that describes your ~~personal~~, ~~academic~~ and ~~professional~~ background, and your ~~reasons~~ for applying

This was my last dulcimer performance at the Chinese Orchestra of ABC University (ABCU). Standing in the middle of the stage, with the notes, tone, and rhyme interacting with each other to form beautiful melodies, memories of the four-year rigorous yet rewarding law studies at ABCU came in waves.

As a dedicated law student, daughter of a judge and music lover, ~~my journey of legal studies started~~ ~~I have had a very clear career goal at the very~~ ~~since they~~ beginning of my undergraduate life. ~~With a clear career goal in mind— to become an attorney who specializes at~~ ~~of~~ ~~Intellectual p~~Property rights law, especially in the area of media and music (专业导师把关 **career goal**, 补充细节). I have ~~done~~ ~~tried~~ my best to enrich myself over the years at ABCU. ~~I took diverse basic courses on Chinese legal system as well as some in-depth courses on IPR law. Apart from the legal training.~~ (根据申请的项目特点和方向, 精炼课程内容) ~~I My systematic and intensive undergraduate training in Law and a minored in International Economics, during which I —and Trade has helped me build a solid academic foundation. Through the courses of Chinese constitution, civil law, criminal law, IP law, procedural law, administrative law, commercial law, international law, a complete legal system is basically formed in my mind. Aside from specific rules, the basic principles also influenced me deeply, help me form an active thinking ability with law. Micro-economics, Macro-economics, Marketing, Accounting, International Trade helps me to learned some about economic analysis methods, which helps provide new perspectives for my future study and research.~~

~~Learning from books and classes is not enough for me.~~ In order to gain ~~some more~~ first-hand experience in **IPR law studies** (修订专业术语表达), ~~during the summer of 2017~~ I took part in the National **Academic** Training Program with a research focus on Music Intellectual Property ~~during the summer of 2017~~. The music intellectual property gets little protection in China. Although we have our

collective management organization of copyright ~~names~~, Music Copyright Society of China (MCSC), it does ~~notn't~~ work well. ~~There was a~~ shocking piece of news ~~was~~ that Feng Wang, a famous rock singer in China, angrily rebuked MCSC because MCSC ~~did not~~ ~~esn't~~ give singers money that users paid. The aim of our program ~~wasis~~ to find out the reason why MCSC ~~could an~~not work well and how to improve it. We visited MCSC for several times and collected the opinions of music users and owners by distributing questionnaires. ~~We also~~ ~~Also we~~ looked up related literatures and interviewed some attorneys and scholars. Finally, we ~~came up with the idea that fond~~ the main problem is that the MCSC is responsible for the government instead of the copyright owners. The government would never really know the ~~requirement-need~~ of music owners, and the fixed license fee is not suitable for the music market. What's worse, there ~~were is~~ only one collective management organization of music copyright, so the organization is in the monopoly position. Thus, ~~my partners and I our team~~ came up with a tentative plan that the government should delegate power to the lower levels, ~~relax-reducing~~ the restriction of ~~establishing~~ copyright collective management organizations' ~~establishment~~. We also ~~used~~ ~~thereferred to~~ American ~~paper-experiences for reference to in~~ designing a system of licenses include ~~ings~~ blanket licenses and other kinds of licenses. ~~The progress was hard, we faced a lot of difficulties. The staff in MCSC even told us we shouldn't study this area because they didn't ask us to. There were also some deficiencies in our study. But there's no regrets left, because we tried our best.~~ I was so glad that our paper had the opportunity to be published in 法学期刊名字有误，请 double check，根据我的了解应该是 Chinese Journal Judgement in Shanxi Province—a Chinese Journal Shanxi Shenpan.（把关专业科研经历，确保严谨到位）

In addition to studies and research, I have also exposed myself to legal practices.— During the spring of 2017 In 2017, I worked as an intern in ABC Representative Office, where I was responsible for carrying out legal research and drafting due diligence reports. I learned ~~a lot of new concept like~~ about Shanghai-Hong Kong Stock Connect, program trading and QFII (qualified Foreign Institutional Investors). I also had the opportunity to attend ~~the~~ lectures ~~presented by attorney Chicago office. The topics are about U.S. corporations and securities law, due diligence, as well as how to form a company in the U.S. presented by attorneys from the Chicago office.~~—（~~During legal research I also noticed some differences between Chinese and American law, just like the type of patent. In China, patent includes invention, utility model and design. While in America, patent includes utility, design and plant~~）这部分单纯比较中美法系和 IPR 相关度太低，你可以讲讲实习里有没有做什么和 IP 有关的，比如你做了什么 legal research 和专利相关工作。替换建议：While contributing to IP cases, I drafted an IP search report regarding Chinese patents owned by XXX Co., Ltd. In another case, I conducted legal research regarding the commencement date of the protection term for U.S. trademarks and analyzed whether or not the trademark should be renewed.（把关实习经历表达，锤炼完善细节）

Outside the academic and professional life, I am also an active volunteer. I joined am a member of ABCU Youth Volunteers Association. In ~~thea~~ program, ~~which aimed at helping hearing-impaired children atwith~~ XXX hearing-impaired children rehabilitation center, ~~my partners and I spent one year~~

helpinged and playinged with ~~the~~ hearing-impaired children there. To better communicate with them, I took sign language classes in DEF University for a semester. The experience made me reflect on the status quo of Chinese charity work. Many celebrities visit the hearing-impaired children every month with gifts and money, making them take it for granted. The children are often invited to perform in the public as well. I once watched their performance at my university. It was a poetry recitation which made us burst into tears because of children's wired pronunciation. However, I doubted that the children even did not know the meaning of the poems. Teachers and public service organizations just use the children to gain public's sympathy, regardless whether it is good or not for the children's long-run cognitive development. Children have rights to live like a normal person, but the charity does not let them do. Besides IP law, I hope with more legal knowledge gained, I can also contribute to the improvement of charity work in China, just as my childhood idol Mother Teresa said, "Few of us can do great things, but all of us can do small things with great love." **（整合相关段落，确保精炼到位）**

~~As a law major, the one-year volunteer experience also made me reflect on the status quo of Chinese charity work. Take the children in the rehabilitation center for example, many celebrities visit them every month with gifts and money, making them take it for granted. Also they are often invited to perform in the public. I once watched their performance at my university. It was a poetry recitation which made us burst into tears because of children's wired pronunciation. However, I doubted that they even didn't know the meaning of the poems. Teachers and public service organizations just use the children to gain public's sympathy, regardless whether it is good or not for their long-run cognitive development. Children have rights to live like a normal person, but the charity don't let them do. Chinese charity work really has a long way to go. Besides IP law, I hope with more legal knowledge gained, I can also contribute to the improvement of charity work in China, just as my childhood idol Mother Teresa said, "Few of us can do great things, but all of us can do small things with great love."~~

As for my career goal, in the short run, I will keep enriching myself through graduate studies in the U.S., hoping to further develop the ability to probe into legal issues from a comparative perspective. In the long run, I plan to open my own law firm to help promote IPR in my home country. **（细化补充 Career Goal）**

My passion for law study, my hobby of music, my volunteer work, and professional experiences in law have all coalesced to shape who I am today. Through these experiences, I have realized that the various elements in my life are not isolated, but closely connected with one other, like a symphony. While a single experience cannot guarantee achievement in the field of law, earnest interests, social activities, and work experience, in conjunction with solid professional knowledge, contribute more comprehensively to the creation of a skilled lawyer. With all the relevant skills and experience, in order to prepare myself for my career goal, I am now ready for a new journey with the LLM program at the University of Southern California (USC).

As a leading institution in IPR, USC Gould has the best location - LA is a city full of fashion and vitality. It also enjoys a high reputation in the field of law, and brings talents together. I am especially

interested in your media and entertainment law certificate, because it can perfectly combine my music interest and my major (导师根据专业经验补充 Why School 项目特色细节—Media and Entertainment Certificate, 更好地和学生音乐+法学的背景联系起来) your LLM program. Through your course Entertainment Law, I would have the opportunity to learn about the role of studios, networks, and music labels, and I could meet transactional and litigation entertainment lawyers from whom I could gain career advice. Through your course Entertainment Law, I will have the opportunity to meet the role of studios, networks, music labels and transactional and litigation entertainment lawyers. They are my role models. I can definitely get some advice of future career. And the main content of the course is legal issues that frequently arise in entertainment transactions and litigation, which is crucial in my dream career. In turn, my unique and rich experience would contribute to the diversity of the student cohort. My music and economic knowledge could bring a new perspective to the class discussions.

~~In turn, my unique and rich experience will add color to the diversity of the student cohort. My music and economic knowledge gained through undergraduate education could definitely bring a new perspective to the class discussion.~~

USC Gould will be an ideal place for me to gain essential skills and insights for my dream. If honored to study at Gould, I am confident enough to be a shining talent ~~devoting myself in~~ IPR law area.
